

## FOR IMMEDIATE RELEASE

EMR is celebrating the largest quarterly sales wins in its 20 year history with a recorded \$21.5M in task order contract wins in the federal and commercial sector during the third quarter of 2009. Federal client wins include projects from the Air Force Reserve Command, US Navy, US Army Corps of Engineers, US Air Force, and US General Services Administration. Commercial wins include Class 1 Railroads and energy clients. The geographic spread of the wins spanned 15 states, from South Florida to Alaska. Wins were due to expansion of business lines and an emphasis on product quality and client service.

EMR added two new business lines in the past two years - infrastructure design-build and natural-and-cultural resources; rounding out other existing business lines - environmental services, emergency management and response, and deconstruction, recycling, and industrial hygiene.
